

Installing and Uninstalling Encryption Suite Pro

Desktop Environments

Installation:

To install Encryption Suite Pro, simply run the setup file downloaded from the Internet and follow the few steps.

Uninstalling Encryption Suite Pro

To remove Encryption Suite Pro from your system, open the Control Panel, double click on Add/Remove Programs or Programs and Features, and double click on the Encryption Suite PRO entry.

Uninstalling Encryption Suite Pro performs the following steps:

1. Verifies that it is safe to uninstall Encryption Suite Pro
2. Deletes the files in the Encryption Suite Pro folder
3. Removes the Encryption Suite Pro icons and Start menu entries
4. Removes the Encryption Suite Pro entries from the registry

Network Environments

Special instructions and MSI installations are available ONLY to our registered business users.

Installation

Please contact us directly via support website at <http://www.powerarchiver.com/support/> for a special network installation setup that has options for silent installation and more instructions on installing Encryption Suite Pro on multiple computers via network (used if you have a 10+ Business license of Encryption Suite Pro).
