

Decrypt Files

To Decrypt encrypted files, click the **“Decrypt Files”** button. A Decryption dialog will appear and you can use the following options to decrypt your encrypted archives;

- **Add Files** - select the file/s that is/are going to be decrypted. Selected files will be added to the decryption tracklist.
- **Add Folders** - select the folder/s that contain/s the encrypted files you wish to decrypt. The folders will be added to the decryption tracklist.
- **Destination Folder**
 - **File's Current Folder** - The contents of the decrypted archive or archives will be saved in the folder of the originating file/s that are being decrypted.
 - **Custom Folder** - Saves the contents of the decrypted archive or archives in the folder of your choice. To enter the custom folder to decrypt to, either type in the folder location in the shown field or click the browse button to navigate to the desired folder of your choice.
- **Open Folder on Encrypting** - Opens the destination folder of the decrypted contents of the decrypted file.
- **Overwrite Existing Files** - Automaticall overwrites files located in the destination folder.

After selecting the desired decryption options click the **Decrypt** button and you will proceed to enter the password to decrypt the encrypted files in tracklist.
