

Using Secure Storage on Cloud

Video Tutorial

How to use Secure Storages synced with your Cloud

Encryption Suite Pro allows you to create a Secure Drive as a folder inside your Cloud of choice.

When creating a new Secure Drive, please select the "As Folder" option in the Mounting Point/Drive tab, click the browse button and navigate to the Cloud folder. There, create a new folder where your Secure Drive will be located. Once OK is clicked, the newly created Secure Drive will appear as a folder in your Cloud and you may proceed to use it.

Please Note:

The Secure Drive will appear as a folder in your Cloud whenever your Secure Drive is mounted/enabled. Once it is disabled, it will disappear from your Cloud.
